

Creation

by Demi Nicole Sommers.

God created the heavens and the earth, he created light and
the good it was worth.

He made the moon and stars and made the sun
shine, he made planets like mars and others one of a kind.

God made

the water and made dry land, it was the time of creation where
later men would stand.

He made plants thrive and gave the world color,
indeed this planet was unlike any other.

He gave the sky fowl and
gave the land creature, every animal had it's own feature.

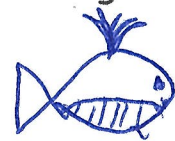

There

were animals swimming some had gills to breath, these amazing
creatures live under the sea.

Some came up for air, others could sing,
these wonderful creatures all had some bling.

Last but not least he
created man, made in his own image and it was grand.

God's creation
was done, but his story had just begun.
