

Title: Why not to write a book  
Written By: Mason Chaffin

"I don't want to write a book. It takes forever to write a book: days, weeks, months, even years. See it takes a long time plus if it takes 15 years it better be a good book."

"You have to make sure that your spelling is correct, and not wrong, and my spelling is incorrect some times, but not all the time."

"The best part is that you can make money from it. Hundreds, thousands or even hundreds of thousands. That's a ton of money. I could buy a lot of toys with that money."

"I have to make sure that I have all of my periods, question marks, exclamation marks, and quotation marks which sounds like a ton of work I need to learn."

"Maybe here in the near future I will make a book of my own, and it will be called: Why not to write a book. That sounds about right."

"I also have to come with a main topic which can be many things like fishing, hunting, baseball, and more things. I will choose baseball because there is winning, and losing."

"Now I see what I just did. I wrote a book of my own. Wow, this book is short. That was a short time to write a book."
