

Title: Train Karts Lost  
Written By:Quinn Jablon

March eighth 2019 1:00 pm me and Mark entered the mysteriest train kart. They searched the kart inch by inch but they couldn't find anything. Until I tripped on a stick and hit the kart door shut and it locked we were stuck inside the train cart they yelled and yelled bloody murder but no one has the kind of ears to hear this far into the woods. I looked at the stick and saw a krevis in the kart door and then?

March eighth 2019 11:00am (skribiling) bang bang come in said I. The door opened. I saw Mark and asked if he wanted to go into the woods with him. Mark did so he said yes. In the woods they were making paths for quick roots back home until they stumbled upon a train kart. Mark went in and I followed Mark into the train kart they searched inch by inch of it but they couldn't find anything. Until I tripped on a stick making him hit the cart door shutting and locking shut. Mark and I yelled bloody murder but no one has the kind of ears the hear this far into the woods. I saw the stick and a krivis in the kart door and then he started to jam it into the lock until it broke and now they were stuck for sure.

March eighth 2019 9:00am (cold) Mark saw leaves in the conner and picked them up for warmth but then he discover a holl and Mark and I crawled out from under the train cart they found another train cart full with boxes filled with warm furry jackets they put them on and went into the train. They fell asleep and woke up.

March ninth 10:00am looking for their trail they made to use for a quick way back home I found the path and told Mark. They followed it and they got home. When they got home Joseph's mom was worried and said that he was going camping with Mark!!!! In the woods by an old train track help us. When we got there there were three cabins. One for me, another for Mark and one for his mother. We found the track and saw the thing you drive with for all the carts me and Mark got in. Mark went first and me second but when I got in the train door shut and that started the engine we went slow then we started to speed up. We searched and saw an emergency button Mark pressed it. It didn't work and next we saw a lever that said don't pull. We tried to pull but it was going too fast until it stopped. We got out and followed the track home and then we had to go.
